

I need  
to go

and find out what's new

and upgrade my bathroom

and make the bathroom more comfortable

and improve personal hygiene

A new level  
of freshness.

The TECEone  
has arrived.  
The toilet with  
shower function.

A new age of freshness  
has begun – the TECEone.

The new TECEone – don't let your bottom get left behind! Because in our view, it generally deserves better treatment than it gets. How about cleansing care, in the form of a freshening jet of water, for example?

As far as our everyday ablutions are concerned, water is obviously essential. So why is four-ply paper the best we can think of when it comes to more intimate personal cleansing? No, it doesn't make sense to us either. That's why we're giving the toilet a makeover, with a new shower function for greater convenience and better hygiene all round.

TECEone – the toilet that does more!

# How it looks!

The TECEone has features on the inside that dazzle – and it looks good on the outside too. Its classic design is intended to harmonise with existing bathroom design and brings a touch of style to any bathroom.

**TECEone**

- 1 The dial on the left allows you to set the water temperature precisely, up to 38 °C.
- 2 The dial on the right allows you to adjust the amount of water as you wish, up to 5 litres a minute.
- 3 A turn to the right, and the centrally located shower arm is pushed forward by water pressure, cleaning itself automatically in the process. A little tip: if you turn the dial gently, any cold water in the pipes can run out first. When you turn the dial back to its starting position, the shower arm retracts, again cleaning itself automatically as it does so.

# How it works!

No new controls to master – if you’ve ever turned a dial before, then you already know how to work the TECEone! That’s how easy and intuitive it is. The rotary selectors are within easy reach on the side of the bowl. Turn the left-hand one and you can set a comfortable temperature, quickly and accurately. Turn the selector on the right and you have precise control of the amount of water. Water pressure pushes the shower arm out and away you go. Plenty of fresh warm water direct from the mains. Sheer enjoyment!

# How convenient!

A whole new dimension of convenience – that's what the TECEone has to offer. The rimless design of the ceramic bowl means that it is particularly quick and easy to clean.

The ergonomically designed toilet seat cannot be bettered. It perfectly matches the contours of the body, making it exceptionally comfortable. Another convenient little detail lies in the clever fixings with inset bolts. These ensure that the seat remains secure, that it can be removed easily for cleaning and is equally straightforward to reattach.

And because we like the smallest room in the house to be nice and quiet, we have also incorporated a soft-close function.

- 1 The rimless ceramic bowl makes the TECEone easier to clean.
- 2 With its soft-close function, the lid of the toilet closes with virtually no sound.
- 3 Relax in the comfort of ergonomically designed seating.

Affordable luxury.  
Spending pennies,  
not pounds.

Gloriously extravagant – as far as quality, fittings and your own wellbeing are concerned! On price, though, the TECEone is really very modest. This new toilet gives you twice the functionality, hygiene and convenience, without costing twice as much. Wonderfully economical – on space, too.

# We love setting trends

Whether it's behind or in front of the wall – as developers of intelligent housing technology, the first question we always ask ourselves is: could this be simpler, better, more attractive? In response, we came up with the TECEone.

We continue to set new standards in areas such as shower drainage, toilet flushing technology and pipe systems – and we've been doing so for over 25 years in 20 different countries around the world. This is because we think like engineers, and because our aim is to produce the best and highest quality solution for you.

See you soon, in your bathroom!

Pipe systems. Pre-wall technology. Flushing technology. Drainage. Separation technology.  
A whole world of solutions. [www.tece.com](http://www.tece.com)

## Product overview

TECEone toilet ceramics  
with shower function  
Part no. 9700200

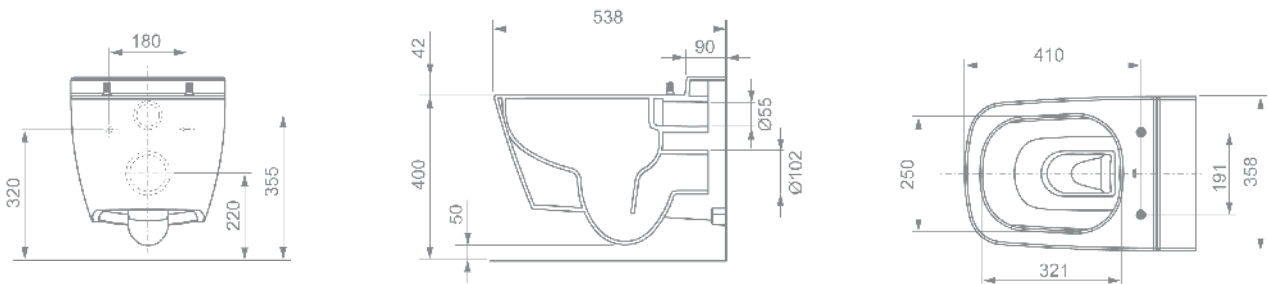

Rimless ceramic toilet bowl with integral shower function for convenient intimate personal cleansing with water. Shower function is connected to the building's hot and cold water supply – no electricity required. Ceramic toilet bowl for in-wall cisterns.

TECEone toilet seat  
and cover  
Part no. 9700600

Toilet seat and lid, fits TECEone ceramic toilet bowls. Order separately.

TECEone ceramic toilet bowl  
without shower function  
Part no. 9700202

Rimless ceramic toilet bowl without shower function for in-wall cisterns.

## Installation accessories

TECEone upgrade kit  
for dry wall construction  
Part no. 9880046

Sound-insulated shell set for pre-installation of TECEprofil dry wall modules for connecting water supply to the TECEone.

TECEone upgrade kit  
for brick wall construction  
Part no. 9880047

Sound-insulated shell set for pre-installation of TECEbox brick wall cisterns for connecting water supply to the TECEone.

TECEone upgrade kit  
for brick wall construction  
Part no. 9880048

Sound-insulated shell set for pre-installation of TECEbox 8 cm cisterns (e.g. Italy) for connecting the water supply to the TECEone.

TECEone bronze  
wall plates  
Part no. 9021032

Two wall plates, 1/2" x 1/2" female thread. For optional use together with the TECEone upgrade kit, as a universal adaptor to existing pipe systems.
