

The background of the advertisement is a photograph of a modern shower installation. It features light-colored, large-format wall and floor tiles. A sleek, metallic shower channel is installed in a corner, with a circular drain cover visible. A chrome shower handle is mounted on the wall above the channel. A teal-colored rectangular box is overlaid on the left side of the image, containing the main text.

VERSATILE.**

With the two new TECeshowerline
shower channel sets you install
design and quality

THE TECEshowerline SHOWER CHANNEL SETS

The TECEshowerline shower channel sets are designed with a DN 50 outlet nozzle that is inserted into the existing waste water pipe on site.

You can add the TECE hair trap for shower channels to the TECEshowerline shower channel sets, by simply placing it on the integrated odour trap.

“I don't want to be searching around for all the different parts on site. Everything I need must be directly available in one box.”

Protected against sewer gases and vermin

The new TECE odour trap reliably prevents sewer gases from escaping while at the same time providing a safe barrier against unwanted vermin. In addition, with a drainage capacity of at least 0.8 l/s, it offers the optimal, invisible connection point between the designer shower area and the drainage system. The new odour trap fits perfectly into every TECEshowerline shower channel and can easily be combined with the optional hair trap. This is TECE quality you can rely on.

GERMAN QUALITY
made for you

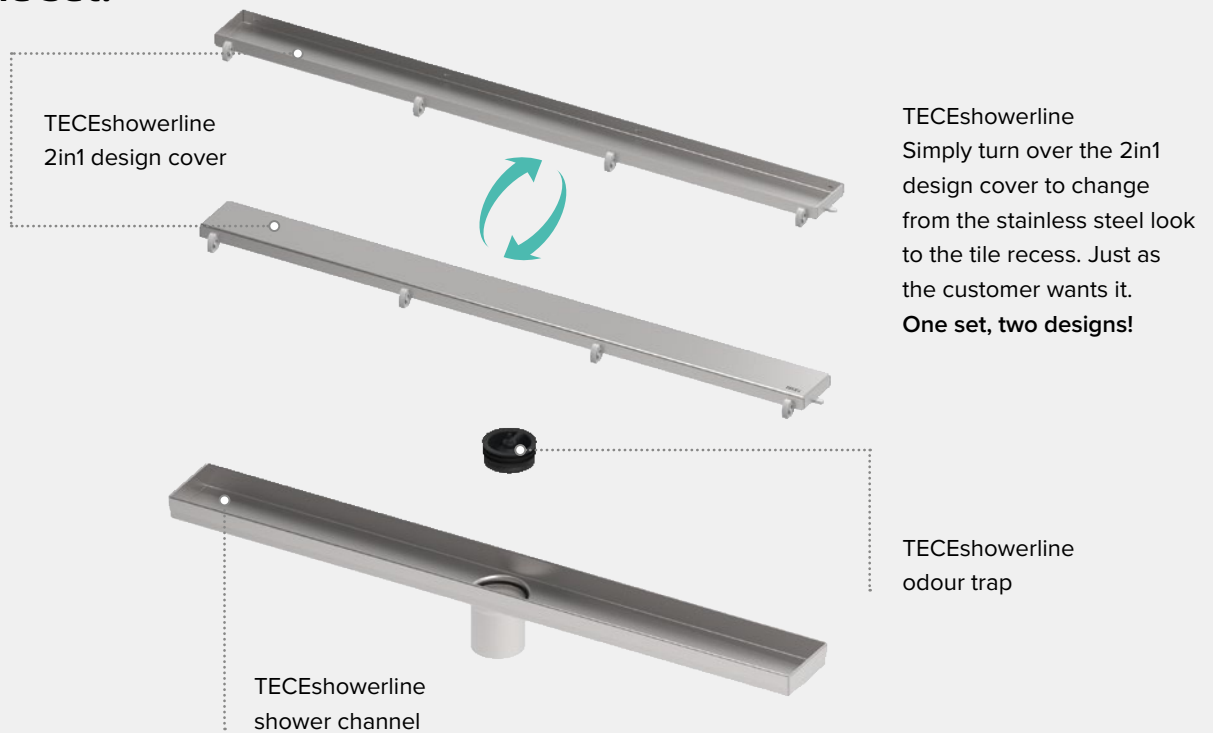

Optimal draining: even if the installation is slightly inclined, the water drainage is improved thanks to the integrated 3D slope, which minimises deposits in the channel body.

What distinguishes all TECEshowerline shower channels:

- Every TECEshowerline shower channel offers maximum hygiene and cleanliness thanks to the integrated three-dimensional slope in the stainless steel base body.
- Of course, all TECEdrainline covers also match the TECEshowerline shower channels.
- Optionally, you can add the TECE hair trap to the TECE odour trap included in the set.
- The new sets are available in lengths of 700, 800 and 900 mm.

TECEshowerline with 2in1 design cover

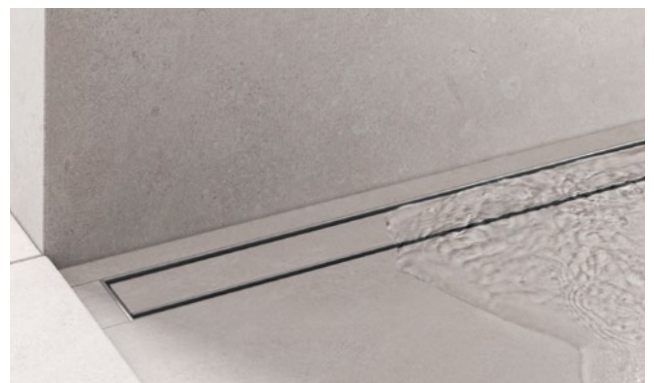

The set:

Decide on site

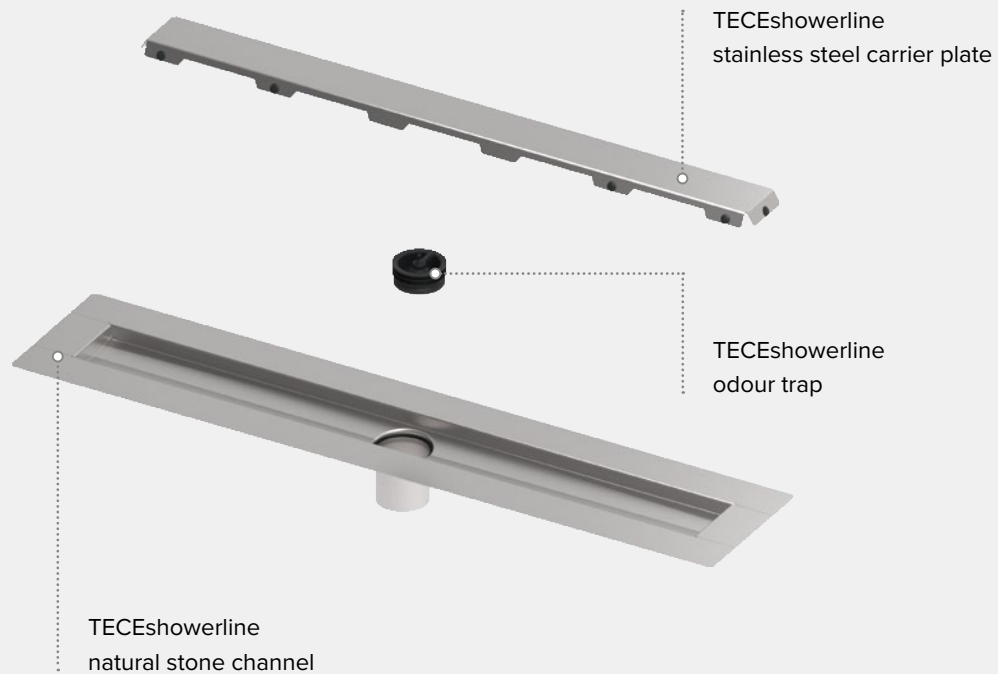

Use the stainless steel look to obtain a high-quality eye-catcher in your shower area.

Alternatively, you can opt for the tile recess for a narrow stainless steel frame that supports your design concept.

TECEshowerline natural stone channel

The set:

The technology:

Thanks to clever details, the TECeshowerline shower channel for natural stone can be installed quickly and safely. The high-quality stainless steel flange offers a large area for receiving a sealing tape.

The result:

An all-around narrow gap of 6 to 8 mm — that's all you need to ensure efficient drainage of the floor-level shower area.

Fig.	Product	System length	Order no.
	TECEshowerline set with 2in1 design cover without sealing flange	700 mm	15201070
		800 mm	15201080
		900 mm	15201090
	TECEshowerline Natural stone channel set	700 mm	15201072
		800 mm	15201082
		900 mm	15201092
	TECEshowerline Odour trap and vermin barrier		15221000
	TECE hair trap		660005
