

PEŠTAN
CON  **LUO**
SMART DRAINS

WE ARE

We are privately held company Peštan, leader in the Balkans in production and distribution of products and solutions from polymers.

Company was founded in 1989 and has been producing water pipes made of polyethylene. Over time, we introduced new materials (polypropylene and PVC) and expanded product range. Today, in our offer you may find more than 6 500 products, divided into four categories:

**PIPING
SOLUTIONS**

**BATHROOM
SOLUTIONS**

**AGRICULTURE
SOLUTIONS**

**HOUSEHOLD
SOLUTIONS**

“Walk in” showers represent new and elegant solution for bathroom. A barrier-free shower concept inspired and motivated us to create Confluo Smart Drains program. We made our Confluo drains of high quality materials, modular, easy to install and clean, cost effective and with modern design, in order to satisfy all customer needs. With more then 350 different models in our offer, we believe we can meet all their needs.

Dive into our Confluo Drains and discover your new gem in bathroom!

Advantages of Confluo shower drains:

- Huge product portfolio — more than 350 different models
- Modularity
- Modern design
- High functionality
- Best buy products

Quality and functionality |

Confluo icons

1 Min. installation height

Minimal construction height of drain, from bottom of the base, up to the holder of the grid.

2 Base diameter outlet

Diameter of base outlet.

3 Maximum flow rate

Maximum flow rate with 20 mm threshold.

4 Base inlet diameter

Diameter of base inlet.

5 Anti-leaking system

Anti-Leaking System represents combination of drain construction and proper installation which allows all leaked and condensated water to go back to drain.

6 2 in 1 system

Grid of drain can be turned and used both for stainless steel/gold and ceramic/glass finish.

7 Base rotation

Base of drain can be rotated 360 degrees.

8 Fine output adjustment

Output of drain can be adjusted by 15 degrees.

9 Water seal height

10 Fine ceramic adjustment

Model have system for ceramic height leveling, so clients have flexibility in choosing surface in bathroom.

11 Self-cleaning base

Output of drain is constructed in way that whatever goes through grid for hair will for sure go through output and then through sewage system.

12 Handicapped accessible

Easy access to the shower.

13 Material of grid

Grid is made of stainless steel AISI 304. Optionally, we can produce grid from stainless steel AISI 316.

14 Load class of grid

Grid is classified as K3, which means that it can withstand 300kg of pressure.

15 Ceramic adjustment

Unlimited ceramic height leveling.

Confluo Linear drains

We produce our Confluo Linear drains in 3 different models (Premium Line, Slim Line and Frameless line), 9 different sizes (300, 450, 550, 650, 750, 850, 950, 1050 and 1150 mm) and 3 different grid finishes (Stainless Steel, Glass and Gold). All models, except Slim, have 2 in 1 system where the same model can be used both with Stainless Steel/Gold and Tile/Glass finish and are characterized as ultra low 360 degrees rotatable self-cleaning S base.

Confluo Wall drain

As Peštan Company always follows trends on world market, we have prepared for our customers the latest model in world of shower drains — Wall drain. This model represents innovation in industry and, besides its new and modern design, it is perfect model for renovations and bathrooms with concealed cisterns. Wall drain has body made of plastic and it is supplied with 2 different grids (Stainless Steel and Gold).

Confluo Board

Peštan "Board" program of preinstalled shower drains represents the result of constant searching for better and more efficient solutions for our customers worldwide. With this product, we made a big step ahead concerning waterproofing, safety and aesthetic, as we have minimized possibility of mistake and significantly reduced the time and effort for installation. With this product, as a producer, we have taken responsibility on our side and made modern, quality and time effective solutions for our clients.

Confluo Standard drains

Peštan Company offers to clients more than 150 different models of Confluo Standard drains. All models have body made of plastic and grid made of stainless steel, glass or gold, which we deliver in various designs (Tide, Square, Drops, Black & White Glass, Ceramic and Gold) and sizes (10x10 cm, 15x15 cm and 20x20 cm). Main advantages are: Big variety of models, maximum flow rate, modular and flexible systems with 6 different output, 3 different types of siphons. You can make your own floor drain system easy for installation and maintenance.

Confluo Garden and Roof drains

In our program of outside drainage, we have 2 models — Confluo Top and Confluo Gardino. Confluo Top is used for drainage of water on flat roofs, and Confluo Gardino is made for driveways and garages. Main advantages of this models: Maximum flow rate, modular and flexible system with 4 different outputs, drainage/anti-leaves system, easy installation and maintenance.

Ultra low S base

Main advantages:

1. 360 degrees rotation
2. Superior flow rate — 48 l/min
 - DN 50 mm output
3. Ultra low — 50 mm
4. Acute angle of siphon — 40 degrees
5. Self-cleaning
 - Smooth plastic
 - Wide channel for water, without any obstacles

Confluo Premium Line is characterized with 2 in 1 reversible grid system which enables you to change your bathroom design on daily basis with stainless steel/ceramic or black & white glass/stainless steel finish and decorative mask that covers all plastic parts. Model has superior flow rate of 48 l/min and minimum installation height of only 52 mm, which makes our Confluo Premium Line the lowest drain in the world with DN 50 mm output and perfect model for most demanding renovation projects.

Confluo Premium Line

Main advantages:

- Minimum installation height — 52 mm
- Maximum flow rate — 48 l/min
- Reversible grid — 2 in 1 system
- 360 degrees rotatable self-cleaning S base
- Without visible plastic parts

Dimensions: 300, 450, 550, 650, 750, 850, 950 mm

Grid Design

Dry siphon for linear drains with O-Ring included for extra protection against bad smells and insects when water evaporate from S base.

* Not included in standard product. Needs to be ordered separately.

ALS

ANTI-LEAKING SYSTEM

ALS – Anti-Leaking System represents combination of drain construction and proper installation, which allows all leaked and condensated water under the tiles to go back to the drain.

During the years, water in bathroom has tendency to build under the tiles as consequence of erosion of grout and moisture in the bathroom. Usually it takes 5–7 years until this problem happens and then a leakage shows up in a place where waterproofing was finished. We have solved this problem with our construction of grid holder, where you have no barrier for water under the tiles. Also, in order that this system works properly, it is very important to do correct slope screed and proper waterproofing as per our instruction manual.

Cross section of linear drain

Confluo Frameless Line is the newest model in Confluo brand, and it is characterized with modern “no frame” design of grid which gives this product unique and elegant look, especially when you use our 2 in 1 reversable grid system and insert ceramic. It is available in stainless steel, black and white glass and 24k gold plated finish with superior flow rate of 48 l/min, all with Anti-Leaking System - ALS and both water and dry siphon for bathrooms which are rarely used, and where the underfloor heating is installed.

Confluo **Frameless** Line

Main advantages:

- Minimum installation height — 62 mm
- Maximum flow rate — 48 l/min
- ALS — Anti-Leaking System
- Reversible grid — 2 in 1 system
- 360 degrees rotatable self-cleaning S base
- Combined siphon — wet + dry

Dimensions: 300, 450, 550, 650, 750, 850, 950, 1050, 1150 mm

Grid Design

Dry siphon for linear drains with O-Ring included for extra protection against bad smells and insects when water evaporate from S base.

* Included in standard product.

Confluo Frameless styrofoam with dual role — Protection during the installation of the drain and and benchmark for perfect leveling of ceramic.

Modern functionality

Minimalistic design

Confluo Slim Line is characterized with minimalist "Slim" design of stainless steel grid, which gives your bathroom a totally different and modern look. Model has possibility of grid leveling from 5-20 mm, which allows various options when you choose your bathroom surface. Anti-Leaking System - ALS is also one of the main advantages of "Slim", which is designed in the way that all the condensed and leaked water under the tiles can go back to the drain without any obstacles.

Confluo **Slim** Line

Main advantages:

- Minimum installation height — 72 mm
- ALS — Anti-Leaking System
- Unique and minimalist design of grid
- 360 degrees rotatable self-cleaning S base
- Height adjustable grid — 5—20 mm

Confluo **Board**

1. **Peripor Board** - Peripor is an expandable polystyrene (EPS) that is particularly suitable for applications exposed to compressive load. The most important properties of Peripor are:

- Excellent thermal insulation capacity
- High density – 45 kg/m³
- Outstanding impact absorption
- Low weight
- Imperviousness to moisture

2. **MAPEI waterproofing** - On Confluo Board is factory applied one of the most quality waterproofings, MAPELASTIC Turbo and MAPEBAND which guarantee 100% watertightness of our system.

3. **Dovetail Joint** - This method of joining the plates provides the strength of a joint that is resistant to all possible stresses. Also it prevent entering concrete between the plates.

4. **Time and cost effective** - A great benefit of the Confluo “Board” preinstall shower drains is that installation time and price is significantly reduced as a board have integrated slopes and applied MAPEI waterproofing.

5. **High Flow Rate** - System provides flow rate of 48l/min, which is in accordance with the highest standards.

We produce our Confluo Board Frameless Line in 2 dimensions (900x900 mm & 1200x1200 mm) and a few board thicknesses, depending on whether you are renovating or making a new building. Product comes with 4 different 2 in 1 grid designs (Chrome/Ceramic, Black Glass/Chrome, White Glass/Chrome and Gold), 360 degrees rotatable S base with drainage capacity of 48 l/min and ALS - Anti-Leaking System. Our boards are made of high quality peripor with density of 45 kg/m³ with preinstalled slopes and it is coated with MAPELASTIC TURBO and MAPEBAND waterproofing.

Confluo **Board** **Frameless** Line

Confluo Webshop Packages

Listening to the needs of our associates, online shop owners, we have created webshop packages with the complete content needed to implement the Confluo range in any online store.

Webshop packages include:

- Photos of installed drains,
- Photographs and rendering of products and all drain elements,
- Text descriptions,
- Technical drawings and technical specifications for all products in the assortment.

Scan QR code for more info and download Confluo webshop packages.

MODULARITY

In order to satisfy the needs of our customers and achieve unlimited flexibility, we created Confluo drains with modular parts, which can be used on multiple products.
