### **TRATTAMENTO PER LA PROTEZIONE DEL VETRO**

L'applicazione del prodotto, processo produttivo effettuato interamente all'interno dello stabilimento Inda, conferisce al vetro caratteristiche particolari di antiaderenza e idrorepellenza, favorendo lo scorrimento dell'acqua e riducendo la formazione di depositi di calcare, saponi o altri prodotti usati normalmente per la pulizia del corpo.

### **PULIZIA DEL VETRO TRATTATO CON INDA GLASS PROTECTION**

Risciacquare dopo ogni utilizzo la cabina doccia e asportare i residui di acqua con un tergivetro o panno morbido. Per evitare alterazioni al trattamento Inda glass protection non utilizzare assolutamente prodotti abrasivi, solventi vari, alcol, candeggina e detergenti aggressivi acidi/alcalini (detergenti per il wc, decalcificanti, sgrassatori, sturascarichi). Attenzione il trattamento Inda glass protection non elimina la pulizia del vetro ma la facilita.

### **GLASS PROTECTION TREATMENT**

*The application of the product, a process completely done in Inda, gives the glass "no stick" and hydrorepellent characteristics. It allows the water to run down and reduce limescale deposits or deposits caused by soaps and products normally used for the body cleaning.*

### **CLEANING OF THE GLASS TREATED WITH INDA GLASS PROTECTION**

*Rinse after each use the shower and remove residues of water with a soft cloth or glass wiper. To avoid alterations to the treatment Inda glass protection absolutely no use abrasives products, various solvents, alcohol, bleach and aggressive acid/alkaline detergents (WC cleaners, anti-limescale, degreaser, drain cleaners). Attention treatment Inda glass protection does not eliminate the cleaning of the glass but eases the cleaning.*

### **TRATAMIENTO PARA LA PROTECCIÓN DEL VIDRIO**

Con la aplicación del producto, que se integra en el proceso de producción y por lo tanto se realiza directamente en la planta Inda, el vidrio adquiere unas características particulares de antiadherencia e hidrorrepelencia, que favorecen que el agua resbale reduciendo la formación de depósitos de cal, jabones u otros productos usados normalmente para la higiene personal.

### **LIMPIEZA DEL VIDRIO TRATADO CON INDA GLASS PROTECTION**

Simplemente pasando un paño suave se eliminarán las pocas gotas de agua que hayan podido quedar sobre el vidrio. Para evitar que el tratamiento sufra alteraciones, no habrá que utilizar nunca productos abrasivos (tanto en polvo como cremosos), detergentes agresivos y álcalis (desengrasantes o similares) ni disolventes fuertes (acetona, alcohol o similares).

### **TRAITEMENT POUR LA PROTECTION DU VERRE**

*L'application du produit, processus de fabrication effectué entièrement en interne de l'usine Inda, confère au verre des caractéristiques particulières d'antiadhérence et d'imperméabilité, favorisant l'écoulement de l'eau et réduisant la formation de dépôts de calcaire, savon ou autres produits utilisés normalement pour l'hygiène personnelle.*

### **NETTOYAGE DU VERRE TRAITÉ AVEC INDA GLASS PROTECTION**

*La simple utilisation d'un chiffon doux servira à enlever le peu de gouttes d'eau restées sur le verre. Pour éviter les altérations au traitement Inda glass protection ne pas utiliser de produits abrasifs (en poudre ou crémeux), détergents agressifs et alcalins (dégraissants et similaires), dissolvants forts (acétone, alcool et similaires). Attention le traitement Inda glass protection n'empêche pas le nettoyage du verre mais le facilite.*

### **BEHANDELING VOOR DE BESCHERMING VAN HET GLAS**

Bij gebruik van dit product, verkregen dankzij een proces compleet gevolgd door Inda, geeft het glas een waterafstotende laag, waardoor het water gemakkelijker naar beneden valt zodat minder kalk, zeep of andere producten, die gewoonlijk gebruikt worden voor de schoonmaak van het lichaam, achterblijven.

### **SCHOONMAKEN VAN GLAS BEHANDELD MET INDA GLASS PROTECTION**

Het gebruik van een doek helpt om de weinige waterdruppels die achterblijven op het glas te verwijderen. Om veranderingen van de Inda glass protection behandeling tegen te gaan, mag absoluut geen schuurmiddel (poeder of vloeibaar), agressieve reinigers, alkalines, ontvetters of sterke oplosmiddelen (aceton, alcohol of gelijkwaardig) gebruikt worden. Opgelet: de behandeling Inda glass protection sluit de schoonmaak van het glas niet uit, maar vergemakkelijkt deze.

### **BESCHICHTUNG DES GLASES**

*Die Anwendung des Produktes verleiht dem Glas durch einen Produktionsprozess, der komplett im Werk Inda ausgeführt wird, besondere Antihaft und wasserabweisende Eigenschaften. Diese erleichtern den Wasserablauf und vermindern die Bildung von Kalk- und Seifenablagerungen und von anderen Produkten, die normalerweise zur Körperpflege verwendet werden.*

### **REINIGUNG DES GLASES BESCHICHTET MIT INDA GLASS PROTECTION**

*Die auf dem Glas verbliebenen Wassertropfen einfach mit einem weichen Tuch abreiben. Zur Vermeidung von Schäden an der Behandlung Inda glass protection keine scheuernden Produkte (Pulver oder milchige Flüssigkeiten), aggressive Reinigungsmittel und Alkaliösungen (Entfettungsmittel u. ä.), starke Lösungsmittel (Azeton, Alkohol u. ä.) verwenden. Bitte beachten Sie, dass die INDA Antikalkbeschichtung die Reinigung des Glases nicht vermeidet aber erleichtert.*
